DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 6, 2, 3, 7, 9-11, 20 and 21 are rejected under 35 U.S.C. 103(a) as being unpatentable over either one of JP '216, JP '420, JP '847 or JP '239 in view of Lindner (US 5,498,431). The JP '216, JP '420, JP '847 and JP '239 references disclose the claimed subject matter except for the kettle washing means having an ultrasonic generator. The patent to Lindner discloses that it is known in the art to have provided ultrasonic generators (30) for treating foods such as cereals, etc. Thus, it would have been obvious to one having ordinary skill in the art at the time the invention was made to have provided either one of JP '216, JP '420, JP '847 or JP '239 with ultrasonic generators in the manner suggested by Lindner for propagating ultrasonic waves to the water supplied in the rice kettle, if desired.

Response to Arguments

Applicant's arguments filed August 11, 2006 have been fully considered but they are not persuasive. In response to applicant's argument that Lindner is nonanalogous art, it has been held that a prior art reference must either be in the field of applicant's endeavor or, if not, then be reasonably pertinent to the particular problem with which the applicant was concerned, in order to be relied upon as a basis for rejection of the

Art Unit: 1761

claimed invention. See *In re Oetiker*, 977 F.2d 1443, 24 USPQ2d 1443 (Fed. Cir. 1992). In this case, the patent to Lindner is merely cited to teach the use of an ultrasonic generator for cleaning to be known in the food art. In response to applicant's argument that there is no suggestion to combine the references, the examiner recognizes that obviousness can only be established by combining or modifying the teachings of the prior art to produce the claimed invention where there is some teaching, suggestion, or motivation to do so found either in the references themselves or in the knowledge generally available to one of ordinary skill in the art. See *In re Fine*, 837 F.2d 1071, 5 USPQ2d 1596 (Fed. Cir. 1988) and *In re Jones*, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992). In this case, the reference to Lindner teaches that it is known to use an ultrasonic generator propagating ultrasonic waves for the purposes of cleaning. Thus, it would have been obvious to one having ordinary skill in the art at the time the invention was made to have provided either one of JP '216, JP '420, JP '847 or JP '239 with ultrasonic generators in the manner suggested by Lindner for propagating ultrasonic waves to the water supplied in the rice kettle. This action is a **final rejection** and is intended to close the prosecution of this application. Applicant's reply under 37 CFR 1.113 to this action is limited either to an appeal to the Board of Patent Appeals and Interferences or to an amendment complying with the requirements set forth below.

If applicant should desire to appeal any rejection made by the examiner, a Notice of Appeal must be filed within the period for reply identifying the rejected claim or claims appealed.

If applicant should desire to file an amendment, entry of a proposed amendment after final rejection cannot be made as a matter of right unless it merely cancels claims or complies with a formal requirement made earlier. Amendments touching the merits of the application which otherwise might not be proper may be admitted upon a showing a good and sufficient reasons why they are necessary and why they were not presented earlier.

A reply under 37 CFR 1.113 to a final rejection must include the appeal from, or cancellation of, each rejected claim. The filing of an amendment after final rejection, whether or not it is entered, does not stop the running of the statutory period for reply to the final rejection unless the examiner holds the claims to be in condition for allowance. Accordingly, if a Notice of Appeal has not been filed properly within the period for reply, or any extension of this period obtained under either 37 CFR 1.136(a) or (b), the application will become abandoned.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Timothy F. Simone whose telephone number is 571-272-1407. The examiner can normally be reached on weekdays between 8:00am-5:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Milton Cano can be reached on 521-272-1398. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
